

Due to increased security by airports, the United States Postal Service and various shipping agencies such as Fedex, many packages are being routinely x-rayed.

If your urine sample is exposed to x-rays during shipping we will not be able to get a reading from it for your Bio Evaluation.  
It is also harmful to your homeopathic remedies to be exposed to the intense x-rays.

To prevent this we are recommending that you invest in a lead-lined film bag to ship samples and receive your remedies in.

Film shield bags/Film Guard bags can be found at your local camera shop. You can also purchase them from us for \$ 25. You will need a medium to large sized bag (approx. 15 rolls of film or larger).

It's important to remember that they MUST be lead-lined. This is not a "camera bag", but a "film protection bag".

Before sending your samples or mailing us your bag to have your remedies shipped in, please label them clearly with your name and phone number.

If you have any questions, don't hesitate to give us a call!
